Setting your Pupil Starting Points

Your pupil starting points should generally be submit as "Start of Year". Start of year simply means that the pupil came into the academic year already having achieved the objective. This then acts as your starting point to measure progress.

If you have a pupil who starts mid way through the year, we would also recommend setting historical assessments as "Start of Year". Please contact us for more information if you are unsure about this.

Setting your Start Points

The Pupil Start Points page will bulk fill all assessment points, if you wish to apply a more granular level of detail to some rung years, please do this within 'Class Assessment'.

Click on "Classes & Groups"

Select "Classes"

Select "Assessment" and then "Pupil Start Points"

Select the class, subject and rung year

Simply click the objectives you wish to complete

Click "Submit", choose "Start of Year" and then submit your start points

Once you have submitted your start points, the 'ticks' will disappear. Don't worry, your assessments have been saved and can be viewed in class assessment or gap analysis.
